

THE MOST VERSATILE MAT ON THE FACE OF THE PLANET

Hardcore Savings

- ✓ Zero Equipment Needed
- ✓ Rapid Installation
- ✓ Small Storage Footprint
- ✓ Lasts For Years
- ✓ Lightly Used Available

Tech Specs

- ▶ High Density Polyethylene (HDPE)
- ▶ 4'x8'x.5" + 1/3" Tread
- ▶ 81 lbs
- ▶ 80 Ton Load Capacity

Mavrik Mats are among our most versatile of Composite mats. They can be used for a variety of applications, including access roads, parking lots, fabrication sites, and golf course renovation & construction. Mavrik Mats are quickly installed with two people by sliding them off of forks and into place. Similarly, they can be quickly installed by sliding them right out of the back of a pickup truck. They are best for rubber tired or tracked equipment. Steel tracks can be used but caution must be exercised to not turn on them as steel tracks will tear them up.

When it comes to ground protection, there's no comparison between Mavrik Mats and traditional plywood as used on golf courses or otherwise, road crossings (brochure). Unlike plywood that needs replacing every few months, Mavrik Mats offer continued protection for years to come. Finally, ground protection and cash protection all tied up in one product, **The Mavrik Mat.**

MAVRIK MAT VS. TRADITIONAL PLYWOOD
